MRS. REHBERG BACK FROM GERMANY

SAYS PEOPLE ARE BUSY WITH THE INDUSTRIES

IS UNREST IN ENGLAND

Thinks Americans Should Not Make Trip Across the Ocean for Visits

Mrs. Dorothea Rehberg and her son, Chares Patcher, of Clyde were in Maryville this morning exchanging English money for Amercan money at the banks. She and her son have just returned from a six-months' trip through England and Central Europe. They left Clyde November 19 and went directly to Liverpool by the way of New York City. They returned to Clyde June 10. They spent about two months in England making settlements concerning their estate and then left for their tour through Europe. From Liverpool through England then went to the following places: Funcha, Spain, London, Paris, Marsaelles, and a trip through Switzerland and up the Rhine as far as German territory.

Mrs. Rehberg's brother, F. L. Patcher, who ives in England, assists his sister in the business of her estate and in getting passports and exchange of money. She makes the trip to England every two years to make settlements. She said that this year the trip from New York to Liverpool was $100 higher than it formerly was. The trip which she made this year cost in the neighborhood of $1,000.

Mrs. Rehberg said that in Germany people were busy with the crops and everyone is working with the appearance of social rest. In England conditions are more unsettled with strikes and unrest. She said that all of the countries of Europe were looking to America to stabalize conditions of the world. There is an antaganism among the nations of Europe toward each other but they have confidence in the United States. All the nations are anxious for the United States to have a hand in all settlements.

Mrs. Rehberg says that the day before she left New York there were 2,200 people at New York to embark for points in Germany. Their purpose was to go for visits to their people and to look over the scenes of their younger days. She believes that the American people, in spite of the fact that they may have been born in Germany and that they may have relatives there, should not make the trip to Germany for a visit. The trip costs in the neighborhood of $1,000 and this amount of money sent to the relatives n Germany would do them much more good than a visit would.

The rate of exchange on German money is so low that it is difficult for the German people to get together enough of it to buy American goods, in spite of the fact that the laboring classes of Germany are now paid about three times as many marks for their services as they were before the war. One American dollar is worth about the same as 120 marks. Before the war it was worth only four. It takes a long time to make enough marks to buy a bushel of American wheat.

Mrs. Rehberg's family is a heavy stockholder in the Great Eastern Railway of England. Her brother lives in England and takes care of the business. Her income is from the railway and from the English estate. She says that it has been seven years since she has been able to collect any rent from the German estate and that she does not know when she will be able to collect from it again.

Mrs. Rehberg came to Nodaway County in 1872 with her husband. Shortly after this time she became an American citizen.

The rate of exchange today on the English pound is nearly $4. The money Mrs. Rehberg collected on her trip was in 10-pound English bank notes on the Bank of England.

BURGLAR AT GRAHAM MUST HAVE BEEN A READER

Broke Into the Wood Zanker Store and Stole Magazines Along With Other Things

It must have been a burglar with a tendency toward culture who entered the magazine stand of Wood Zanker at Graham last night.

Or was it just a matter of a crook hoping to find and read an explaination of a better method of carrying out his "jobs?"

At any rate he carried away, along with some tobacco and cigars, a number of magazines.

The maurader entered the store by a window, removing the screen in order to do so. The total value of the goods taken is said to be about $10 to $15. Mr. Zanker is a crippled man. He has lived in Graham for many years.

Sheriff Steve A. Roach was called to Graham this morning but was unable to get any trace of the burglar. It is not known whether it was local talent on the job or some one passing through.

MRS. W. M. WALLIS DIED AT 12:15 THIS MORNING

Had Only Been Sick a Week—Services at Home of Howard Strong With Burial in Oak Hill.

Mrs. W. M. Wallis, Sr., died at 12:15 o'clock this morning at the St. Francis hospital after a week's illness of acute indigestion with heart complications. Mrs. Wallis was taken sick a week ago Wednesday and was taken to the St. Francis hospital Friday night. Her condition was regarded as somewhat beter yesterday but during the afternoon she gradually grew worse.

Funeral services will be held Saturday afternoon at 2:30 o'clock. The services will be held at the home of Howard Strong on West First Street where Dr. and Mrs. Wallis made their home since disposing of their residence property. Burial will take place in the Oak Hill cemetery, where Mrs. Wallis' father and mother are buried.

Mrs. Wallis was born in the State of New York on September 29, 1844. With her parents, Calvin and Jane Leach, she came to the Pickering community about forty-nine years ago. She was married to Doctor William M. Wallis on April 28, 1875. They resided in Pickering until about twenty years ago when they moved to Maryville.

Mrs. Wallis is survived by her husband and three children. They are: Mrs. Lafe C. Allender of Altantic, Ia., and Dr. Frank C. Wallis and Dr. W. M. Wallis, Jr., of this city. Two sisters and two brothers also survive Mrs. Wallis, being Miss Belle Leach and Mrs. Henry Bowen of Auburn, N. Y., C. B Leach of Opelousas, La., and C. A. Leach of Jacksonville, Fla.

COURT HOUSE HAS PASSED 40TH YEAR

CORNER STONE WAS LAID JUNE 24, 1882

IMPRESSIVE CEREMONIES

In Spite of the Intense Heat the Crowd Stood Throughout the Entire Program

The corner stone of the present court house was laid with much pomp and ceremony on June 24, 1882. It was a great day in Maryville and early in the morning citizens from over the county came pouring in from every direction.

An account in part taken from the Nodaway Democrat follows:

"Headed by Pryor's brass band, the parade started after one hour delay. The different orders in the parade were the Master Masons, the Royal Arch Masons, the Knights Templar, the I. O. O. F., the Encampment, St. P. I. A. C. B. Society, the fire company, Company F, 4th regiment, N. G. M. The parade marched around the business diserict of the city to the front entrance of the courthouse square.

"The courthouse yard was a mass of humanity. The heat was almost intolerable yet the assembled thousands stood and witnessed the entire ceremony with the greatest interest.

"The ceremonies were impressive throughout. The top of the stone was raised by means of a derrick. The stone is 20x22 inches square and 20 inches high. It is sandstone and contains a little over five cubic feet, and and weighs 160 pounds to the cubic foot, which makes the whole stone weigh between 800 and 900 pounds. It is divided into an upper and a lower half. In the lower half is the box for the deposits, size 14x28 inches and six inches deep.

"After the top of the stone had been raised, the box was placed in the receptable and securely cemented in place. The box is of copper, size twelve inches long, eight inches wide and six inches deep, and contains the following articles:

History of Nodaway County.

Book of Constitution of the Grand Lodge, A. F. & A. M.

Charter and ordinances of Maryville.

Corporate history of Maryville, prepared by city council.

By-laws of Nodaway Lodge, No. 470 A. F. & A. M.

Laws of I. O. O. F. of Missouri.

Constitution of Grand and subordinate Encampment, of Missouri.

Articles of incorporation of St. Patrck's I. A. C. B. Society, of Maryville.

History of organization and list of members of Womans Christian Temperance Union, of Maryville.

Copies of invitation issued by Masonic fraternity, on this occasion.

A copy of the Nodaway Democrat, of June 22, 1882.

Two copies of the Maryville Times, one dated February 3, 1882, and one dated June 16, 1882.

A copy of the Maryville Republican of June 22, 1882.

History of Industry Lodge, this city of A. O. U. W.

Also a number of pieces of the coins of the county.

"As soon as the box was in place, the Grand Officers of the Masonic Lodge proceeded with the impressive ceremonies of the order. A. M. Dockery, then Grand Master, was in charge of the Masonic ceremonies. He made a short and eloquent address, mainly on the growing grandeur of our noble state. After the address of Grand Master Dockery, the procession then reformed and marched to Bariteau's grove, where a magnificent repast was given to all orders participating. The ladies having the refreshments in charge, are entitled to the grestest praise for the manner in which they performed their duties.

"After dinner the audience assembled at the grand state where they listened to the magnificent address of the Rev. Howard Henderson, DD., LLD., of Hannibal. For over an hour did the Rev. Doctor hold the audience by the eloquence of his words."

To Visit in St. Joseph.

Mrs. J. A. Smith and daughter, Vivian, left this afternoon for St. Joseph where they will visit for about ten days at the homes of Mr. and Mrs. Clyde Avitt and Mr. and Mrs. Lewis Branson. Mrs. Avitt and Mrs Branson are sisters of Mrs. Smith.

COUNCIL SETS CITY LEVY AT 6.40 MILLS

NEW RATE WAS MADE AT MEETING LAST NIGHT

VALUATION IS$5,237,287

Is Estimated That Amount Raised by Taxes Will Be About $33,518.20

At a meeting of the city commissioners held last evening, the levy for the coming year was fixed at 6.4 mills and it is estimated it will produce about $33,518.44 in taxes. The valuation of the city is estimated to be $5,237,287, the merchants valuation being estimated.

The taxes in the city this year will be a decrease of $6,323.49 over a year ago. In 1920, the levy was 13 mills but the assessed valuation of the city was a great deal less.

The levy as fixed and the probable amount of money it will produce follows:

General fund, 3 mills, $15,711.84; Library fund, .5 of a mill, $2,618.69; Lighting streets, .6 of a mill, $3,142.32; Old water bond principle, 1.3 mills, $6,808.44; old water bond interest, .6 of a mill, $3,142.32; new water bond principle, .2 of a mill, $1,047.44; and new water bond interest, .2 of a mill, $1,047.44.

The dog tax was kept at $3 and the poll tax was $2.

The street lighting levy was cut about one-half as there was quite a surplus in that fund. The library levy was also reduced. There was $8,000 in bonds retired during the past year of the second water bond issue.

The new water rates effective June 1 will mean an increase of about $1,600.

The mayor's report for the month ending July 5 shows the following balances on hand:

General $9,720.23; street $908.07; library $2,395.31; Old water bond $4,275.55; old water bond interest $3,600.82; second water bond $93.60; second water bond interest $2,335.30; street lighting $6,062.67; water department $542.45.

E. L. Padgett was refused a permit for a sign for the W. S. Broyles Cleaning shop because it was made of glass and wood.

A crossing which was asked to be put in at Fillmore and Grant streets, a block north of Lincoln street, was referred to Mayor F. P. Robinson. Mr. Robinson said that it was probable that a crossing would be put in at this place.

The report of the chief of police to the city council for the past month shows that he turned into the city $129.60. Of this amount $81 was collected from dog taxes, $40 from fines and $8.60 from costs.

The scale report showed $10.42 turned in to the city from that source and $6 from storage on one car for a period of two months.

LAMKIN NAMED AS ONE OF N. E. A. VICE PRESIDENTS

President of College Selected by Committee—Favor County Unit System

Uel W. Lamkin, president of the State Teachers College was selected by the committee on nominatons as one of the eleven vice-presidents of the National Education Association at its meeting in Boston this week.

DR. CLAUDE P. FRYER SPEAKS TO VACATION BIBLE SCHOOL

Tells Children of the Work of the Health Department and Significance

Dr. Claude P. Fryer, county health officer, talked to about ninety-two children who are in attendance at the Vacation Bible School yesterday and explained to them the value of health control and interpreted the significance of the physical examinations which the county health officers are giving the children of the county.

This is the second time that Dr. Fryer has talked to the children of the Bible School. The other time he read them health stories upon the care of the body and then asked them questions concerning the work that he had covered. Dr. Fryer says that the children were so interested in the work that a pin could be heard to drop any place in the room during the stories.

He came from Quincy, Ill., last night where he had been visiting friends.

CONCEPTION WANTS SANITARY SCHOOL

WOULD BE FIRST IN COUNTY TO CONFORM TO RULES

PAINT FOR BUILDING

Floors to be Oiled to Keep down Dust —Dr. Fryer Meets With Board

Members of the school board of Conception are anxious to get their school cleaned up and in first class condition so that it will be the first school in the county which conforms to every sanitary measure required by the state board of health.

Dr. Claude P. Fryer, county health officer was called to Conception last night to meet with the board and advise concerning the sanitary conditions and to work out a color scheme for the school.

A contract has been let to paint the entire school building inside and out. The contract says that the work must be completed by August 1. The insde of the five rooms of the building will be painted in blue and white. The walls will be a light blue and the ceiling white. They will be finished in flat paint which will do away with the gloss and glare of the light and give a soothing affect to the eyes of the students.

New single desks have been ordered for part of the rooms. These will be fastened to 2x2 planks so that they can be moved about from place to place when the floors are to be oiled. The floors will be oiled at regular intervals during the year to keep down the dust.

A new concrete cap has been made over the well and a new pump installed.

New blinds whch are adjustable from either the top or the bottom have been ordered for the windows.

The toilets will be remodeled so that they will meet all of the sanitary requirements of the state board of health and then the Conception schools will be in good shape to begin school next fall.

VERNE TRUSTY ESCAPES FROM OFFICERS AT ST. JOSEPH

Was in Charge of a U. S. Deputy and Had Been Taken to a Clinic for Treatment

While being treated at the Community hall clinic yesterday forenoon at St. Joseph, Verne Trusty, a federal prisoner held in the county jail, jumped through a window and escaped. William H. Sampson, deputy United States marshal, had Trusty in charge at the time, the St. Joseph News-Press says.

Sampson said that he and a guard had taken Trusty and four other federal prisoners to the clinic for treatment. He was sitting in the reception room with the four while Dr. C. Greenberg was giving Trusty attention. He heard Trusty knock a screen from a window which opened into the alley west of Patee Market. Sampson ran to the outside but the man was out of sight. Doctor Greenberg said that he had stepped out of the office a moment when he heard the crash as Trusty tore the screen loose. Trusty is about twenty-four years old, six feet tall, has dark hair and blue eyes. He was brought here by federal officers a month ago to await trial at the fall term of court on a charge of driving a stolen car in nterstate traffic. His home is in Burlington Junction.

PROPOSAL FOR CONSTITUTION

J. C. Wilson of Bethany, is the author of the following proposal which was submitted to the Constitutional Convention by another delegate at Mr. Wilson's request.

"Cities of the second, third and fourth class, and villages shall be allowed to become indebted for the purpose of constructing improvements and utilities within and without the city limits of the aforesaid cities in an amount in excess of the income and revenue provided for any one year, by the assent of a majority of the voters thereof voting at an election to be held for that purpose, which indebtedness shall not be in excess of 15 per cent of the value of the taxable property therein, to be ascertained by the last assesment for state and county purposes, previous to the incurring of such debt. The assent of the voters to carry with it a provision for the collection of a tax in addition to the regular tax provided for general purposes, sufficient to pay the interest not exceeding 6 per cent on such indebtedness as it falls due and to create a fund for the payment of the principal thereof in thirty years. Provided, that the aforsaid cities shall be permitted to issue additional bonds without the assent of the voters for street and drainage improvements, where the total cost of the aforesaid improvements has been assessed against the property benefited and the city at large, as benefits may appear, and provision made by said assessments for the collection of funds for the payment of indebtedness within twenty years, together wth interest not exceeding 6 per cent on such indebtedness as it falls due. The cities' full faith and credit to be pledged for the payment of the aforesaid bonds so issued. Provided further, that provision shall be made by general laws for the enactment and defining of the aforesaid powers, to prevent the abuse of same."

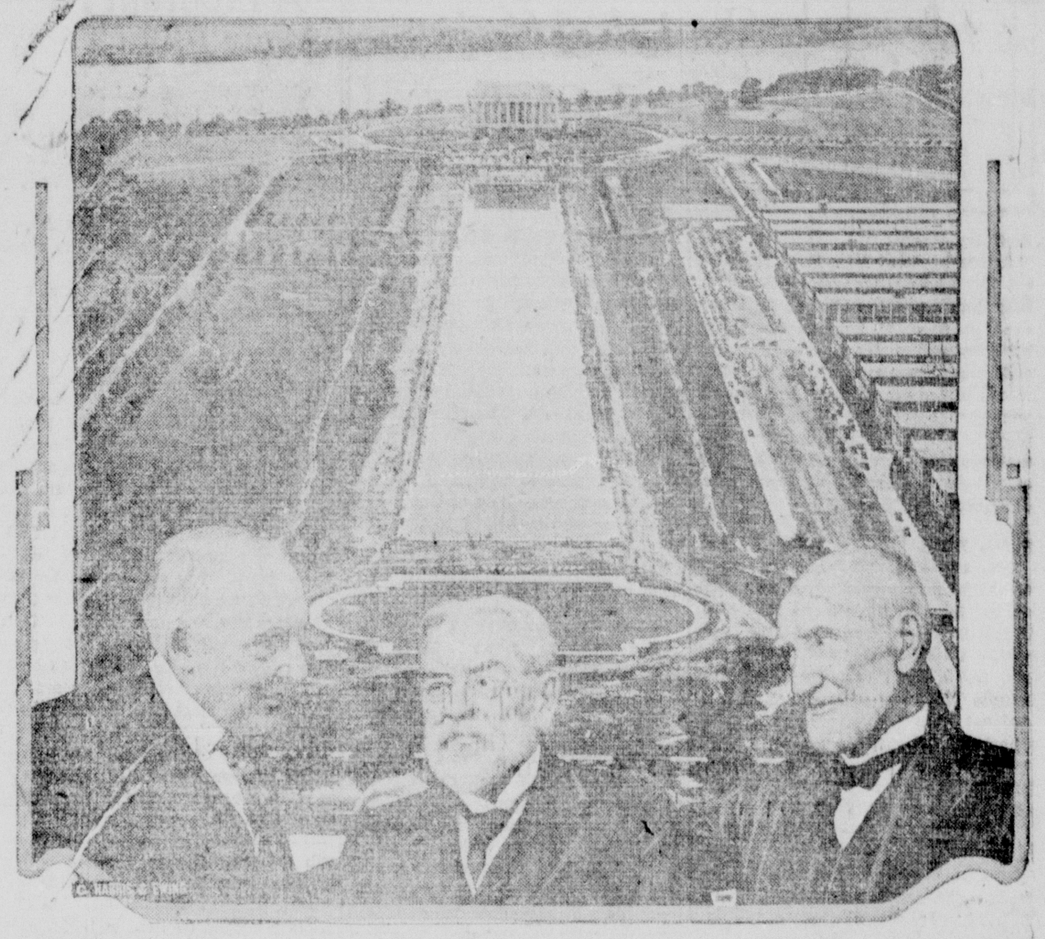
Nation's Memorial to Abraham Lincoln Dedicated



Of all the Memorial day ceremonies the most important was the dedication of the beautiful Lincoln Memorial in Washington. The above photograph of the building and grounds was taken from the top of the Washington monument during the ceremonies. At the bottom are President Harding, who delivered the address; Robert Todd Lincoln, son of the Emancipator, and Congressman Cannon, who was one of the originators of the plan for the memorial, as they appeared together that day.

Are You Planning A Program For Your 100th Year?

A New Jersey farmer, Daniel Garton of Friendship, began his second century yesterday by tending his chickens and splitting the days supply of firewood. At the age of 100 years he scorns canes, daylight saving time and other devices of the weak. He intends to keep right on working in the usual way until he becomes old.

While Mr. Garton was at his chores yesterday, another lively man of almost the same age was at Columbia University, takng a degree and being told by President Butler that he was the most interesting figure in American public service. The poetic reporters often refer to Dr. Stephen Smith as a centenarian. He is not, of course he will not be 100 years old until next February. He, like the Friendship farmer, does not let time interfere with his work. Dr. Smith keeps busy. You see, he did not become a doctor until 1850. He was then 27 years old and any man of 27 in 1850 was considered to be getting on into middle life. Dr. Smith has been practicng only seventy-two years; if he had a fair start it would be at least five years longer than that.

How many of our readers are planning a program for their 100th year? It is something well worth looking forward to.—New York Herald.

RIVER BRIDGE WILL NOT BE MOVED TO NEW DITCH

County Court Decided Yesterday on This Proposition—New Bridge Over Ditch

The county court at a meeting held yesterday afternoon with a number of parties on the banks of the drainage ditch near Barnard decided not to move the old river bridge over the drainage ditch. The drainage board will build a bridge, 40 feet long and 18 feet wide, as soon as possible over the ditch.

It was thought at first the best thing to do was to move the old river bridge to the new bed ditch and then build a dam near the old river bridge and fill in the old bed. There seems to have been much opposition to this plan.

At their meeting yesterday, the remonstrators were represented by Judge W. C. Ellison, the drainage board by Fred Harvey and the county by Prosecuting Attorney Charles McCaffrey

Grandview

HERE is a fabric tire in a class by itself. Literally it has no real competitor. It is a super fabric tire built for long, hard service on small cars. Regardless of road conditions or of any ordinary overload, on an established average it outwears from two to three tires of other makes.

This tire is made with an extra layer of fabric and a heavy, special tough red tread which is responsible for its extraordinary service and for its fame.

You cannot find a user who "knocks" the Fisk Red Top—you can find thousands to praise it beyond all other tires.

There's a Fisk Tire of extra value in every size, for car, truck or speed wagon.

Forumettes

It would be a good idea
For a lot of men to wear
Tail lights so those in
A hurry would not hit them.

There are a lot of men who are like some of the firecrackers which small boys shot Tuesday. They are fizzers.

We can't understand why some tobacco is called chewing tobacco. By observing a number of men use it we would rather call it eating tobacco.

A Maryville girl can get mad if you kiss her and get mad if you don't.

After a man gets tired of certain amusements he is prone to refer to them as follies.

There are a lot of automobile drivers in Maryville who regard a sign reading, "Danger, Drive Slow" as an infringment of their personal liberty.

A good many of the June brides have learned by this time that the ideal lover they married is a deal of a husband.

The Maryville mother who has a hard time getting her small son to take a bath on Saturday night could accomplish her purpose easily by having a sign reading, "No Swimming" painted on the bath room door.

Uncle Abner says a critic by another name would usually be a knocker just the same.

Nothing worries a Maryville girl so much as to discover the man "after her own heart" is not after it at all.

Nothing short of a miracle can rob a woman of words. That is perhaps the reason she forgets to thank a man when he gives her his seat in a street car.

A Main street woman reported to her husband that a snake had parked himself in their backyard. The concerned husband waited for the reptile to come out of the hole and after a two hour vigil saw a big field frog come up for his daily glass of dew.

Louise, the stenographer says unless the average Maryville man can see a slight improvement in himself, it is hard to convince him that the world is growing better.

A mean man always is inclined to attribute the dislike of his neighbors to jealousy.

Nothing will make the average woman so suspicious as to have her husband volunteer to go to church.

"How do you like my new suit for a fit" one bounder asked a companion the other night." Looks more like a convulsion" replied his genial companion.

Many a man's pessimistic views of life are due to his acquaintance with himself.

Vagrant Musings.

The average Maryville woman can talk faster than she can think.

More men are made good from the kitchen than from the pulpit.

A fool wants gratitude, a wise man cash.

If you pay you can keep your credit.

A man seldom exhibits his temper until after he looses it.

The Road to Yesterday.

Who of us can't remember the days when the form of illumination in Maryville homes was the coal oil lamp in many grotesque and absurd forms and many homes were considered the last word when they had a gaudy hanging lamp with glass prisms all around the shade hanging in the "sitting room?" Also when the man who had his house wired for electric lights was considered ahead of the procession of ultra-moderns?

KANSAS MINERS PREPARING TO RETURN TO WORK

Girard, Kan., July 6—Four thousand followers of Alexander Howat prepared to return to work, acting against the sentiment of the supporters of John L. Lewis, international miners president. Miners, through committees chosen at the Franklin, Mass., meeting are calling on operators and offering to dig coal.

Forrest O. Gooden of Kansas City arrived here this morning to visit a few days with his parents, Mr. and Mrs. Cooper Gooden.

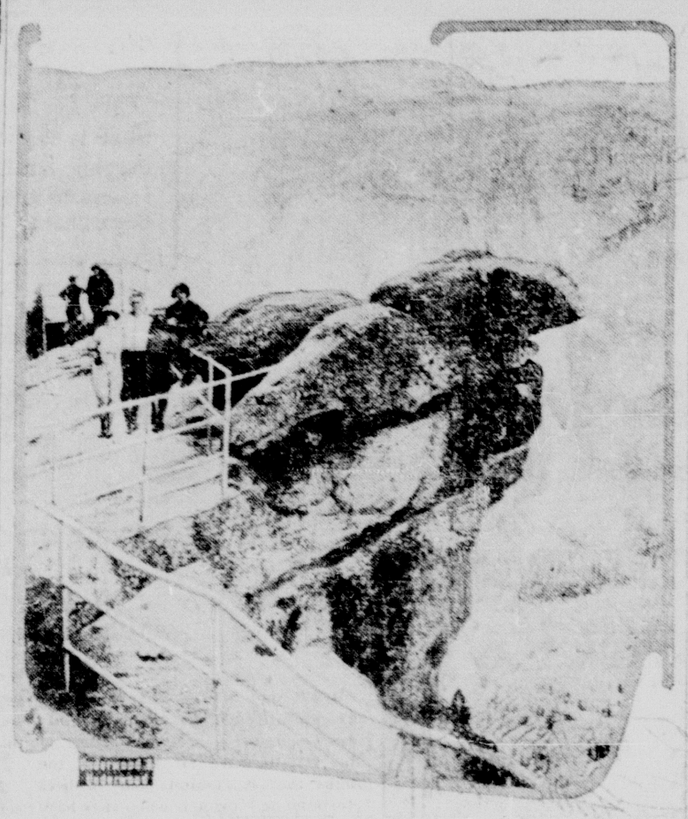
Famous Yosemite Park Rock Fenced



Here is the first photograph of the new fence erected by the United States government in Yosemite National Park, to keep people off the famous overhanging rock at Glacier Point. The rock sticks out into space over Yosemite valley with a sheer drop of 3,254 feet. It has been a favorite spot for daredevils to do stunts, such as standing on one hand or hanging over the edge with a rope.

Few Realize Amount of work Done in Making Nodaway County Films

The laboratory in Maryville for the production of motion pictures is one not equaled by other towns of this size in the state and larger and is surpassed only by commercial producers. Orders for motion pictures of Nodaway county are not only local but often come from chambers of commerce such as St. Louis asking for co-operation in the production of agricultural films.

Of the people who have seen the Nodaway County Agricultural Films, how many realize the hard work which is behind the production of these pictures? People have filled school houses and churches to sit and enjoy hours looking at the beauties of their own county—farms, live stock, grains, preparations of soil, scenic beauty, every phase of agricultural education and progress and take it as a matter of fact.

Step into the studio of Ralph Marcell and take a peep into the secret of the production of this film and the many operations almost staggers one. Then it is that one realizes that it takes a knowledge of physics, chemistry, photography, art, and electricity, connected with mechanical operations and hard work to produce this matter of fact pleasure for the people of the county.

The first operation in production of the picture is when Mr. Marcell and George A. Pickens, get their minds together to discover what progress it is in Nodaway County that is worth while to record in pictures. The process of taking the picture is similar to that of kodaking with the exceptions of the fact that many exposures are made of one. This negative is developed very much like the ordinary one and then a the film is made from it. The work of this developing and printing can best be explained by Mr. Marcell for to follow him around the laboratories while he washes and develops them in deep vats of chemicals and dries them on revolving cylinders requires one who is experienced in fast walking and observation.

The art titles are usually made with some phase of agricultural scene of activity as a background. A picture is made and the title painted on them. Then under a very bright light on a specially contrived apparatus several feet of the film is taken of the art title and it is inserted in its proper place on the film.

Principals of art and color are applied to produce beauty in the pictures. The production of a spraying scene in a Nodaway County orchard in the original colors requires not less than ten different processes but when it is finished one feels as if he were in the orchard.

Keep Pace With Evolution

DARWIN declared that the human race was merely an evolution of the monkey tribe. Some people agree with him. Others do not.

But there is no denying that even within the memory of most of us there has been considerable of an evolution in the human mode of living. And today, this evolution is buzzing along faster than ever.

There has never been a time when conditions changed so rapidly—when life bettered itself so consistently. New comforts and conveniences are coming in all the time. And the rapidity with which they are invented and put before us vitally affects us all.

To take advantage of these things, you must keep yourself informed. You must know not only what they are, but also how much they cost and where and how to get them.

The only way you can know this is to be a regular reader of the advertisements.

Advertisements tell of all that the world is doing to make you more comfortable, your work easier, your methods better, your clothing and food problems less irksome. They tell you how you can save time—and effort—and money in the selection of the things that make life worth while.

Advertisements are interesting, instructive and highly profitable to you.

Keep in touch with modern evolution by reading the advertisements.

CROWD IN PANIC TRAMPLES WOMEN AND CHILDREN

New York, July 6—One hundred and seventy-five were injured in a panic, caused by a short circuit on an express train. The accident halted the train. Smoke from the burning insolation caused the passengers to believe that the coaches were burning. Women and children were knocked down and trampled.

Miss Lanning Here

Miss Myrtle Lanning of La Moure, North Dakota, came last night to visit her sister, Mrs. Verlin Conley and family and friends for several weeks.

Mr. and Mrs. A. W. Noble and daughter, Mrs. Minnie Waller, and grandchildren, George and Genevieve of Okemah, Okla., who have been visiting at the home of Mr. and Mrs. J. E. Stewart left this morning for Minnesota where they will spend the summer.

Big Scale Industry Has Made America Rich

AMERICA is the richest country in the world because of its great natural resources, and because it has utilized large scale organizations to develop them. It has done big things in a big way. Other nations have had more workmen, cheaper labor, more densely settled areas, yet America has outstripped them all. Why? Because of "Big Industry"—vast, centralized organization.

The measure of this big-scale organization is service. The big unit is constructive—far-seeing—resourceful—permanent. It can be depended upon to provide essential commodities in times of stress.

A big organization should be judged by the service it renders.

The Standard Oil Company (Indiana) is a big organization, built squarely upon service. It has grown and prospered because of the need for its service. It is doubtful if a smaller organization could give the service rendered by this Company.

Because of its size and efficiency, the Standard Oil Company (Indiana) can manufacture on an economical scale. From one natural resource it produces hundreds of useful products at a minimum cost, thus enabling the Company to sell each of its long line of products at a lower price than would otherwise be possible.

Because of its thorough distribution service, resulting from its great volume of business, it is possible for the man living in the remote corners of the 10 Middle Western States served to get such petroleum products as he needs with facility almost equal to that of the man living in the city.

The forecast for 1922 is for a heavier demand for petroleum products than this nation has ever known. The Standard Oil Company (Indiana) has keyed its entire organization to meet this demand. Regardless of the emergencies which may arise, the Company believes that its organization will be able to meet the situation.

for our wondrous West. Nature and Uncle Sam have gone partners in giving and preserving for your education and enjoyment the majestic vacation playgrounds in Western America—sights Europe would give millions for but can't have because they are ours to enjoy. And now your own home-town railroad (Burlington) finishes the job by providing splendid service to and from them.

Vacation costs are down this year. Your vacation money will go much farther. Why not make this a vacation of big sights, big experiences, "big" travel comforts — a life lasting memory, and see the Burlington's West — the real West?

Ask me about the grand circle tour—three National Parks (Glacier, Yellowstone and Rocky Mountain) and Scenic Colorado, in one trip, on one ticket.

Scored on the Lawyer.

A well-known barrister at the criminal bar, who prides himself on his skill in cross-examining a witness, had an odd-looking witness upon whom to operate.

"You say, sir, that the prisoner is a thief?"

"Yes, sir, 'cause why—she confessed it."

"And you swear also that she repaired shoes for you subsequent to the confession?"

"I do, sir."

"Then we are to understand that you employ dishonest people to work for you, even after their rascalities are known?"

"Of course! How else could I get assistance from a lawyer?"

"Stand down!" shouted the man of law.—London Tit-Bits.

JOHN ROBINSON'S CIRCUS ADVANCE CAR NO. 1 HERE

Show to Be July 19—Parade Will Start at 10 O'Clock in the Morning

John Robinson's Circus styled "America's Oldest and Best," is coming to Maryville on Wednesday, July 19. Advertising Car No. 1, passed through today and left a number of billposters and lithographers, which herald the coming of the big circus. Another advertising car will come next Wednesday. Then will come the last of the special agents, to be followed by the 24-hour man, and then the show will come rolling into Maryville itself. Four special trains will bring the Circus here from Shenandoah, where it will appear on Tuesday, July 18.

One of the features of the engagement here will be the street parade at 10 o'clock. As the show has but a short run here, the pageant and procession is certain to leave the circus grounds at Harrison's Field on the exact stroke of 10 and it will cover the principal business sections. The John Robinson parade is over a mile in length, and has more open dens of wild animals than any other circus on the road.

From Maryville, the circus will go to Falls City, and then into Kansas. This will be the only town in Missouri to be played by the John Robinson circus.

FORMER RESIDENTS ARE VISTING IN MARYVILLE

Mr. and Mrs. C. F. Bagby and daughter, Mrs. Effie Lapworth of Olathe Kan., arrived in Maryville this morning for a visit here and at Skidmore. They were former residents of this county leaving here in 1902. They formerly resided at the Dr. Dean farm, south of Maryville, and after leaving here went to a farm near Hopkins. Mrs. Lapworth is connected with the Patrons Cooperative Bank at Olathe.

ELLIS ANDREWS INJURED IN CELEBRATING FOURTH

Powder in Gas Pipe Exploded After He Thought Fire Had Gone Out —Temporarily Blind

What might easily have proven a fatal accident, occurred Tuesday night at the home of O. H. Sayler in South Hopkins.

Norval and some of the neighbor boys were sending up fireworks and Ellis Andrews was there with a "home made noise maker" that worked perfectly so far as the noise is concerned.

It was simple in construction—a piece of gas pipe that could be filled with powder and fuse attached.

It had been charged and match applied when Ellis decided it wasn't going off, so he went to investigate and just as he picked it up, the powder exploded burning the boy's face and eyes terribly.

He was totally blind after the accident and cannot see this morning but Dr. Maxwell is certain the sight of the eyes is not impared and that the boy will be all right in a few days.—Hopkins Journal.

THAT BAD BACK.

Do you have a dull, steady ache in the small of the back—sharp, stabbing twinges when stopping or lifting—distressing urinary disorders? For bad back and weakened kidneys Maryville residents recommend Doan's Kidney Pills. Read this Maryville statement.

Miss M.H. Donahue, 724 North Mulberry Street, says: "My back caused me a great deal of trouble and I felt miserable and worn out. Sharp shooting pains often caught me in the small of my back. My back was lame and sore and occasionally dizzy spells came over me and left me in a weak condition. A friend advised Doan's Kidney Pills and two boxes not only brought great relief but completely cured me. I am glad to say these few words in praise of such a good reliable remedy as Doan's Kidney Pills."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Miss Donahue had. Foster-Milburn Co., Mfrs., Buffalo, N.Y.

WITH NODAWAY CO. FARMERS

Frank Fagerquist

Frank Fagerquist has a prospect for a big fruit and berry crop at his farm a mile north of Maryville on the Hopkins road. In fact he has already had a big strawberry crop, picking and selling a hundred crates, although he says that the crop was cut a little short by the fact that it did not rain enough during the berry harvest season. He has plowed up a half of the patch from which he picked his strawberries and has another patch equal to the amount he plowed up coming on for next year. It is his plan to pick from a patch two years and then plow it up, always having a new patch to take the place of the old one.

Mention most any berry or fruit that you will and Mr. Fagerquist has it. He has a good many grape vines and they are pretty well loaded and the grapes are large. He has been picking the raspberry crop and planted this spring 700 new raspberry plants. He says that the raspberry crop was not very heavy this year, but with the new plants he hopes to make a big harvest next year. He has forty peach trees on the place and they are pretty well loaded too.

If you want to see plumb trees that are really loaded you should go into Mr. Fagerquist's orchard. Some of the varieties are so thick on the limbs that it reminds one of bees clustered on a branch when they have swarmed. He has twenty of these trees.

The next big job of harvesting that Mr. Fagerquist will have will be the blackberry crop. He has a quarter of an acre of these berries and they are just getting ripe. Within a day or so it will be possible to begin picking them. H says that the rains that have been falling are just what the berries need if they are to yield their best.

Mr. Fagerquist has a part of his orchard surrounded with hog tight fence. He says that he will turn his hogs in the orchard when a lot of the windfalls are on the ground and let them clean up. He will then take them out while the apples are being picked and turn them in again to let them clean up after the apple harvest. Mr. Fagerquist is getting a start in spotted Poland China hogs. He started last August with a pure bred sow and now has twelve of the breed and expects to enlarge the herd more.

Mr. Fagerquist was raised in Iowa and later lived east of St. Joseph, farming on rather a large scale. He says that he decided that he would get a smaller place where he would not have to work quite so hard. Accordingly he purchased the place he is now on from J. A. Clark. There is only twenty-seven acres in it but he says that he does not believe he has improved the situation so far as work is concerned. He believes that it is about as big a job to take care of all the fruit and berry crops that he has as it was to run a larger farm.

A. R. Martin

A. R. Martin has the basement ready, the foundation in and a part of the lumber on the ground for a new house at his farm a mile north of Maryville on the Hopkins road.

Lawrence Gault

Lawrence Gault, who lives just north of town on the Hopkins road, raises no small grain but he is busy at laying by his twenty acres of corn. His second crop of alfalfa is about ready to harvest and he intends to begin on it the last of this week or the first of next. He is putting in all his spare time now between caring for the crops at painting the house.

S. L. Mozingo

S. L. Mozingo is putting up at his farm just north of town his second crop of alfalfa. Yesterday afternoon he had it all in the shock and says that he expects to put it in the barn, although he stacked the first crop out. He says that the second crop is of better quality than the first and since there will not be room sufficient in the barn for all the cuttings this year he stacked the first out. He expects to get twenty-five tons from the four crops on his eight and one-half acre field.

T. Y. Neal

T. Y. Neal, who lives a mile north of the Burlington depot, has ten stands of bees at his place. He says that they have not done much good this year. He believes that it takes a lot of rain to make things most conducive for the bees to make a big lot of honey and thinks that the rainfall has not been sufficient this year. Mr. Neal has about a hundred Rhode Island Red chickens and they look fine. He has an acre of corn that he believes is larger than any in that section of the country. He was able to get it planted in April.

Joe Hansen

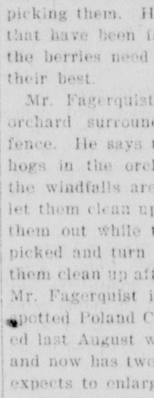
Ed Cunningham is putting up the second crop of alfalfa at the Joe Hansen farm north of town. Mr. Hansen says that the second crop is especially heavy. Mr. Hansen does not keep any stock at his farm, being employed at the Behm & Hanson Cigar factory in Maryville. He says that he expects to sell the hay.

T. A. Parrish says that he planted his wheat during the first part of October and that it is practically free from Hessian Fly. He reports, however a field of wheat on Allen Eckery's farm which was planted in September, is infested to a small per cent with the pests.

Mr. and Mrs. Miles Fast, Annabel Fast, Arcelle Ward, Glen McClaran and Velmar DeVault spent the day Sunday picknicking at Big Lake.

Ed Brewer is in Turkio on business today.

There is Strength in Every Tablet



One dose often helps commence to enrich your blood and revitalize your worn-out exhausted nerves—Nuxated Iron is a newer form of iron, like the iron in your blood and like the iron in spinach. It is so prepared that it will not injure the teeth nor disturb the stomach. It is ready for almost immediate absorption and assimilation by the blood while some physicians claim metallic iron which people usually take is not absorbed at all. If you are not strong or well you owe it to yourself to make the following test: See how long you can work or how far you can walk without becoming tired. Next take two five-grain tablets of Nuxated Iron—three times per day, after meals for two weeks. Then test your strength again and see how much you have gained. Nuxated Iron is sold under an absolute guarantee that your money will be refunded if you do not obtain perfectly satisfactory results. For sale in this city by

After the installation had taken place the following appointments were made: Warden, Harve Mendenhall; conductor, Jake Baldock; right supporter to the noble grand, Earl Baubletts; left suporter to the noble grand, Claud Shell; right supporter to vicegrand, Elihu Shell; left supporter to vice-grand, Earl Duncan; right scene supporter, B. J. Ferguson; left scene supporter, Jim Thompson; chaplain, Clint Adams; inside guardian, George Lee; outside guardian, C. D. Kelley.

The following members of the Maryville lodge attended: Marion F. Smith, Frank Orcutt, Guy Eads, Henry Trullinger, Virgil Rathbun, Gene Rathbun, William G. Sawyers, William Williams, Virgil Guthrie, Glenn Guthrie.

HOW MUCH DO STRIKES COST THE NATIONS?

Curious Figures Based on Department of Labor Statistics.

Washington, July 6.—(Capital News Service).—Statistic issued by the Department of Labor show that strikes in this country average more than 3,300 per year. It is not contended by the department that its figures are accurate, since they depend upon newspaper and trade paper reports for the most part, but that they are under, rather than overstatements.

It is impossible truthbully to estimate the average cost of a strike, since they vary so in duration, number of workmen affected and economic loss through whatever industry is wholly or partially shut down. But if the most conservative possible estimate be adopted, and it is considered that the average strike affects 100 workmen and that the average strike lasts 10 days, the total arrived at is 3,300,000 working days lost per year. If the average cost to each workman is $5.00 per day and the average loss to each industry does not exceed three times the loss to the workmen, then strikes cost this country some $66,000,000 a year.

It is not believed that these figures are anything but suggestive. The average strike undoubtedly affects thousands, rather than hundreds and for many more than ten days; few union laborers receive as little as $5 a day, and, of course, the industry affected suffers out of all proportion to the workmen.

But, it is pointed out at the Capitol if it were true that only $66,000,000 were wasted by strikes every year, that $66,000,000 spent in proper channels on arbitration would undoubtedly stop most if not all the strikes.

It might be an economic measure to spend a part of it for accurate statistics of strike costs to the country; a little education on what it really costs to stop work might make people less willing to indulge in, or cause, strikes.

GUIJA TO THE RESCUE

After Miss Bessie Melvina Furbush, sixteen years old, had been missing a week from her home at Boston, her parents got out the family ouija board, which spelled the message that Bessie was safe but had been tied up by an auto accident while riding with a man named "John." Investigation by the authorities proved the "spirit" message was true, and Bessie is now safe at home.

Peculiar Old English Belief.

An odd custom which brought the key and the Bible together was one that used to prevail in England up to within the latter quarter of the last century. It was called "Key and Bible," and was used for the detection of thieves. A key was placed over an open Bible at the words, "Whither thou goest, I will go" (Ruth 1:16) and the fingers of the person being held so as to form a cross, the text was repeated. The names of suspected persons were then pronounced in succession, and when the name of the thief was uttered, the key was supposed to jump and dance about. An instance of this method of thief-finding was brought before the magistrates at the borough petty sessions at Ludlow as late as January, 1879.

Nail in Spine Twenty-One Years.

A nail was removed from a Cape Breton man at a Toronto hospital, that had been imbedded in his spine for 21 years. It was necessary to remove three pieces of vertebrae to get the nail. It is said that the patient who was hurt in a railway accident is well on the way to recovery.

ECONOMIC CONDITIONS OF RAILROADS FAVORABLE

Washington, July 6—Despite the coal strike and other labor difficulties the railroad's economic conditions throughout the country are for the most part favorable. The average prices collected by the roads has not fallen below 40 per cent above pre-war levels.

Fishing Is Fine

In a card to the Democrat-Forum from Irvin Bartram who with Mrs. Bartram and family are on a fishing trip at Arnold's Park, Ia., he writes fishing is fine and he had just caught a ten-pound pickeral. He says they have had rains in that section and that the crops are fine, also the fruit crop is going to be abundant.

DIFFERENT KINDS OF MARKS IN SANDS OF TIMES AT S. T. C.

In Hall are Names of Those Who Have Put Forth Effort—On Birch Tree Another Type.

In the corridor on the second floor to the right of the entrance to the assembly room is located a list of the winning contestants in the annual literary contests. In this list will be found the names of persons who were willing to put forth that personal effort to win the honors to which they were entitled. Those names represent a class of students of whom the college is proud.

South of the college stands a cluster of birch trees, emblems of the beauties of nature. Upon these trees are engraved the initials of a wholly different type of student. Those who art indifferent to the welfare of the college and to the beauties of nature.

Fellow students, to which class do you belong? Are you risking your future by disfiguring the college property or are you striving to inscribe your name where it will be an honor and credit to your college and to yourself?—Green and White Courier.
